

DK11 WIRELESSHART DEVELOPMENT TOOLKIT

Microcyber's DK11 WirelessHART development toolkit can help device manufacturer to quickly and efficiently develop and test WirelessHART field device, to shorten time to market, improve performance, and improve core competitiveness.

Feature

- All the required materials to develop WirelessHART field device are provided. No need to purchase other device.
- Have passed the FCG WirelessHart Certificate.
- Long-term interoperability test has been done with many similar products.
- Provide rich library files, sample code, detailed technical development documents.

**WirelessHART®**

Toolkit List

- G1100 WirelessHART Gateway ×1
- M1100S WirelessHART Module ×5
- DEV-WH-X Development Board ×2
- DEV-WH-N Development Board ×3
- 2dB Omni-directional Antenna and connection wire ×5
- 24VDC Power ×1
- 5VDC Power ×2
